Work Experience

- I work in the RAKSUL company in the Japan for April 2023-Present(3 years 1 month)
- Designed and implemented a scalable search and agent infrastructure for Vertex AI and Gemini Enterprise capabilities (including search and agent spaces), and fostered cross-organizational collaboration with product managers, UX designers, and engineering teams.
- Owned system architecture, technical roadmap, engineering execution, launch readiness, and cross-team alignment for multi-quarter projects, ensuring timely delivery of enterprise-grade AI solutions.

Education

東洋大学

情報連携学部 / INIAD, 情報連携学科 · (April 2019 - March 2023)

Side project

InterviewGPT

AI-powered technical interview preparation platform
Founder & Lead Engineer

Founder and sole developer of InterviewGPT. Responsible for product design, system architecture, and full-stack implementation of the platform.
